Availability: January – June 2027

EDUCATION

Northeastern University, Boston, MA

Expected April 2029

Candidate for Bachelor of Science — Major: Data Science and Business Administration

GPA: **3.97/4.00** Honors: Dean's List

Relevant Coursework: Foundations of Data Science, Advanced Programming with Data, Intermediate Programming with Data, Introduction to Databases, Discrete Structures, Financial Accounting and Reporting, Managerial Accounting, Financial Management, Business Statistics, International Business and Global Social Responsibility

SKILLS AND INTERESTS

Languages: Python, Java, SQL

Frameworks & Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit

Tools & Platforms: GitHub/Git, Docker, MySQL, REST APIs, VS Code, DataGrip

Interests: Weightlifting, competitive swimming, Pokémon trading card collecting and market analysis, running, cooking

PROJECT EXPERIENCE

Apollo – Campus Reservation App, Database Developer

March 2026 – April 2026

Tech Stack: Python, MySQL, Streamlit, Flask, Docker

- Collaborated with a 5-person team to build a role-based campus reservation platform that unified room booking, maintenance help tickets, and facility management into a single MySQL-backed application.
- Designed a 12-table relational schema modeling users, buildings, spaces, bookings, and accommodations, with foreign-key constraints enforcing referential integrity and preventing orphaned booking records.
- Built Streamlit interface pages for the club representative role, consuming a shared Flask REST API across 26 endpoints.

Housing Price Forecasting Model, Developer

March 2026 – April 2026

Tech Stack: Python, pandas, scikit-learn

- Built a regression pipeline with a 3-person team to forecast quarterly U.S. housing price index change from five macroeconomic indicators, merging six FRED time series into a 112-quarter panel spanning 1991–2019.
- Implemented per-variable lag tuning and a chronological train/test split to prevent lookahead bias, improving out-of-sample R^2 from 0.00 to 0.32 and showing that same-quarter indicators carry no predictive signal.
- Evaluated models on adjusted R^2 , RMSE, and residual analysis, producing correlation heatmaps and predicted-vs-actual visualizations in Matplotlib and seaborn to communicate where the model breaks down.

EXPERIENCE

Leefy Cards, Founder and Operator, Boston, MA

August 2026 – Present

- Founded and operate a Pokémon TCG resale storefront on eBay, running sourcing, inventory intake, photography, pricing, listing, fulfillment, customer communication, and financial tracking end to end.
- Generated \$4,000+ in gross sales across 300+ orders in under two months while scaling the storefront to 950+ active listings.
- Built a Python cash-basis P&L system over a 600-row transaction ledger, tracking revenue, fees, inventory, and margin by product lane as well as pricing rules for an automated pricing system that is benchmarked to TCGplayer market values.

Islander Taste Chinese Restaurant, Team Member, Staten Island, NY

August 2018 – Present

- Advanced from basic tasks (folding wontons, taking orders) to managing inventory and costs at a family-owned restaurant.
- Handled customer service, order accuracy, and order turnaround during high-volume dinner and weekend hours.

FIRST Tech Challenge Robotics, Co-Founder and Team Captain

September 2023 – February 2025

- Co-founded the school's first FTC robotics team, serving as Engineering Lead in 2023–24 and Team Captain in 2024–25.
- Modeled a rotatable, extendable claw intake mechanism and redesigned the robot chassis across two competition seasons.
- Managed team operations end to end, compiling parts buylists, delegating build tasks, and coordinating team apparel orders.

Pathfinders, Curriculum Development Intern, Manhattan, NY

January 2024 – June 2024

- Created lesson plans and hands-on coding activities in Python and Java for beginner student programmers with no prior coding experience, scaffolding concepts from syntax basics to fully working programs.
- Adapted instructional material to varying skill levels, translating concepts into age-appropriate exercises.
